

Woodlake Villas News Drop Down Entry Gate

The Drop Down Gate, (referred to as DDG), is now installed and will be in operation on January 5th. It is timed for **ONE VEHICLE ONLY**. The DDG works with your existing swipe card or your click to enter. When you swipe your entry card or use your click to enter, you must drive up to the DDG and wait for it to open and come to a complete stop. At that time you should drive through both gates **SLOWLY**, (No more than 5 MPH), do not speed! If someone has used their card or click to enter before you, you must *wait* until the DDG has returned to the closed position before you use yours. If you swipe your card or use the click to enter before the DDG closes, it will not open when you drive up to it and you will have to back up and drive around to use your entry pass again. This could cause a possible accident or traffic jam. By waiting your turn it will insure that you will get in without any problems. Please make sure that you always have your entry pass to get into the property. Woodlake Villas **will not** be responsible for any damage to any personal property. Anyone that does damage to any of the gates, (entry, exit or drop down gate), will **be** responsible for the cost to fix or replace it. If you have any question about the gates please contact the on-site office.
